

Sachin Pathak

+91-8445390124 | spathak84453@gmail.com | LinkedIn | GitHub

SKILLS

Programming Languages: Python, PySpark, SQL
AI / GenAI: Azure OpenAI, GPT-4, Prompt Engineering, LangChain, Generative AI, Agentic AI, LLM Integration, RAG, Model Fine-Tuning, ML
Cloud & Data Engineering: Azure Functions, Azure Data Factory, Azure Databricks, Azure Logic Apps, Azure Data Explorer, ADLS Gen2, Azure Cognitive Search, Azure Document Intelligence

EXPERIENCE

MAQ Software

Noida

Senior Software Engineer 1

October 2025 – Present

- Led enterprise-scale AI initiatives using **Azure Prompt Flow**, **GPT-4**, and **Azure Cognitive Search**, supporting **3,000+ daily users** and improving query relevance scores by **40%**.
- Designed reusable prompt orchestration frameworks with validation, hallucination mitigation, retrieval pipelines, semantic search, and document intelligence controls; shipped a GPT-4-based Azure DevOps extension adopted by **6+ teams**, increasing developer throughput by **25%**.
- Streamlined distributed workflows across **8+ pipelines**, reducing execution latency by **40%** through parallelization and performance tuning.
- Implemented production-grade monitoring using **Azure Application Insights** and **Azure Data Explorer**, reducing incident diagnosis time by **30%** and improving SLA adherence.
- Guided **10+ engineers** across **12+ Agile sprints**, enabling on-time delivery of **5+ cross-functional projects** with measurable improvements in code quality and review turnaround.

MAQ Software

Noida

Software Engineer 2

September 2024 – September 2025

- Built automated ingestion pipelines processing **50GB+ of CRM Dataverse data daily** into **ADLS Gen2** using **Azure Logic Apps**, increasing data availability SLAs from **95% to 99%**.
- Executed transformations on **10M+ records per day** using **Azure Functions**, shortening data preparation cycles by **65%**.
- Developed multilingual NLP workflows using **Azure Databricks**, **PySpark**, **Snowflake**, and machine learning techniques, achieving **92% accuracy** across **6+ languages** and improving downstream data consistency by **45%**.

MAQ Software

Noida

Software Engineer 1

June 2022 – September 2024

- Contributed to **3+ Generative AI initiatives** by building document classification and content extraction tools with **Azure AI Services**.
- Delivered LLM-powered solutions to structure and normalize enterprise documents, supporting **5+ internal stakeholders** across product and analytics teams.
- Collaborated with **product managers, QA, and UX designers** across **4+ releases**, incorporating feedback to reduce post-release defects by **20%**.

PROJECTS

- **Generative AI Platform:** Architected an AI-driven entity extraction system that increased recognition accuracy by **40%**. Deployed Dockerized Azure Functions, optimized search indexing, implemented GDPR-compliant comparisons, and improved processing efficiency by **25%**. Added advanced text analytics capabilities, including multilingual interpretation, achieving **92% accuracy**.
- **AI Chatbot Solution:** Engineered a conversational AI platform using **Azure Prompt Flow** and **Azure Cognitive Search**, serving **3,000+ users daily** and enhancing query response quality by **40%**. Systematized data pipelines with **Azure Databricks** and **Azure Logic Apps**, processing **150GB/day**, orchestrating **25 workflows**, and saving **30+ hours/week**.

EDUCATION

Bachelor of Technology in Information Technology

Noida

Greater Noida Institute of Technology, CGPA: 8.33/10

August 2018 – June 2022

CERTIFICATIONS

- Microsoft Certified: Azure AI Engineer Associate
- Databricks Certified: Data Engineer Associate
